ABOUT US

GoDataFeed's cloud-based platform offers seamless channel integration, product data optimization, and feed automation, making it easy to manage product distribution and performance across every channel you sell on. The software ensures your product information is always accurate, up-to-date, and in compliance, reducing your team's workload and saving your company valuable time.

But the platform doesn't stop there. Our Smart Feeds go beyond compliance to provide in-app optimization feedback to help you improve campaign performance by enhancing product data. In fact, our customers have seen a 20% increase in sales and a 35% decrease in workload after using GoDataFeed.

TABLE OF CONTENTS

- 04** Rearrange content for max engagement
- 05** Dynamically control content output
- 06** Segment products for better targeting
- 07** Manage ecommerce feeds in one dash
- 08** Filter underperforming products
- 09** Get detailed performance feedback

Automated Product Listing Updates

GoDataFeed allows you to automate product listing updates, ensuring your content remains current and relevant across all your sales channels.

Custom Rules for Product Inclusion/Exclusion from Feeds

With GoDataFeed, you can set custom rules to dynamically control which products appear in your feeds, optimizing your product selection for each sales channel.

Dynamic Keyword Insertion

GoDataFeed helps you incorporate dynamic keyword insertion in your product listings, improving SEO rankings, and driving more traffic to your products.

Intelligent Pricing Adjustments

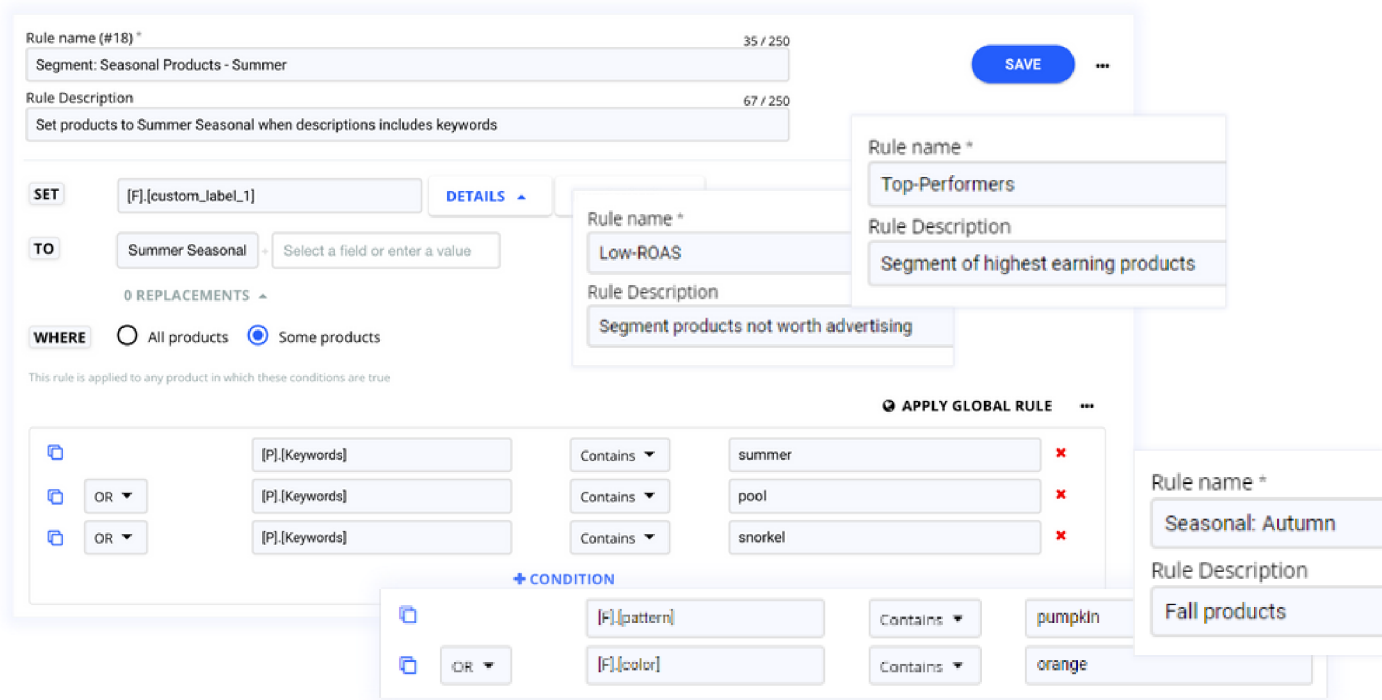

GoDataFeed's dynamic pricing feature enables you to adjust your product prices in response to market trends, ensuring competitive pricing and maximized sales.

Seasonal Product Feed Adjustments

GoDataFeed allows for dynamic control of seasonal products, ensuring only in-season items are displayed in your feeds, enhancing relevance and customer engagement.

Near Real-Time Inventory Management

With GoDataFeed, you can dynamically sync your inventory quantities across all channels, updating product availability in near real-time to prevent overselling.

Custom Feed Rules for Better Segmentation

GoDataFeed enables you to set custom feed rules, allowing you to segment your products based on performance, price range, or other criteria for more accurate targeting.

Performance-Based Product Segmentation

GoDataFeed enables you to group products based on their performance metrics, helping you target your marketing efforts towards high-performing items and reassess strategies for underperformers.

Geo-Targeted Product Segmentation

With GoDataFeed, you can segment your products based on geographical relevance, helping you target customers in specific locations more effectively.

Dynamic Product Tagging

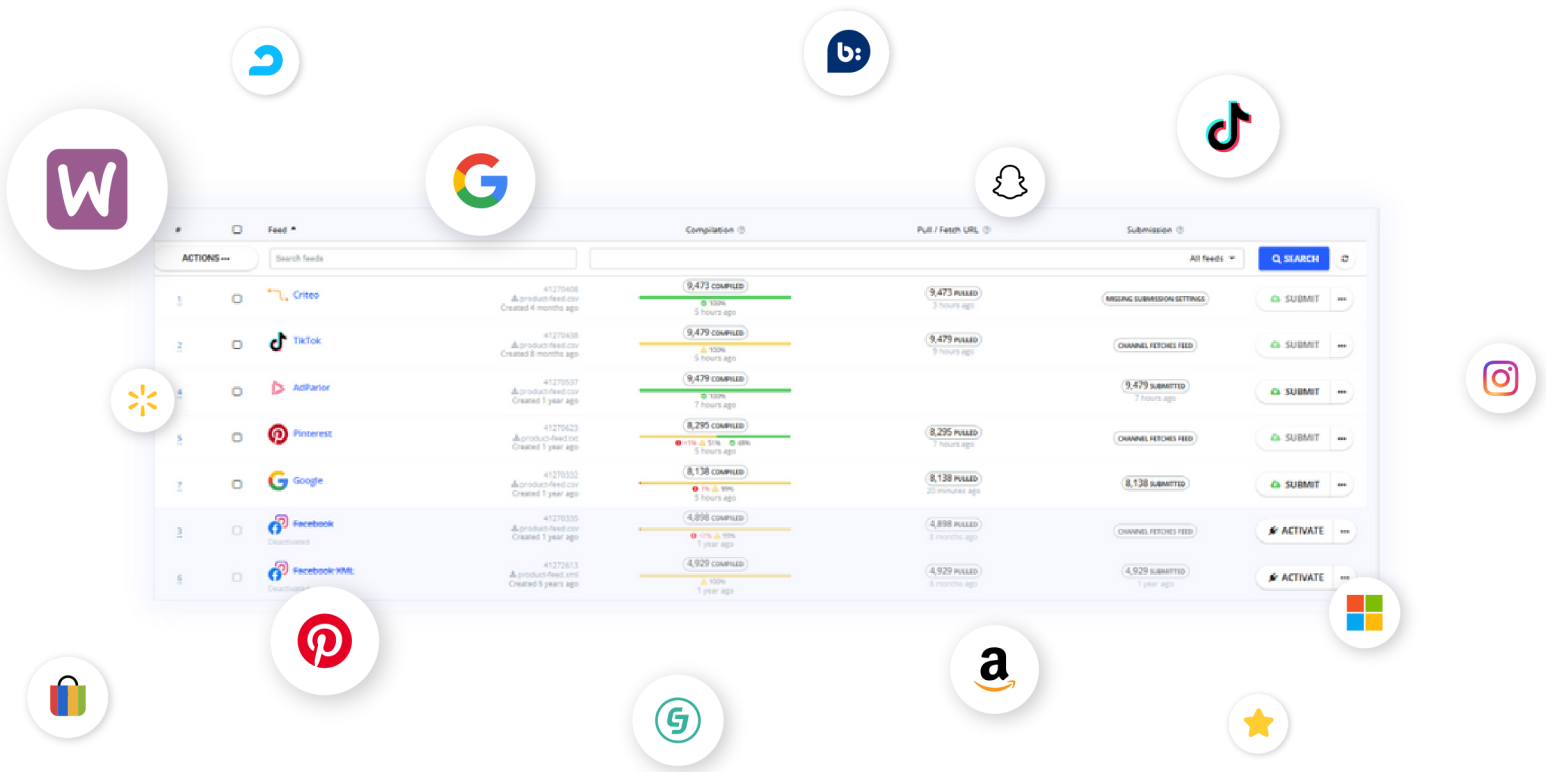

With GoDataFeed, you can tag products based on various attributes, enabling you to create targeted campaigns for specific product segments.

Seasonal Product Segmentation

GoDataFeed helps you segment products based on seasons or events, enabling targeted marketing for seasonal trends or special occasions.

Attribute-Based Product Segmentation

GoDataFeed allows you to segment your products based on attributes like color, size, or brand, enabling more precise targeting and personalized marketing campaigns.

Centralized Feed Management

GoDataFeed provides a unified dashboard to manage all your ecommerce feeds, streamlining operations and providing a holistic view of your multichannel marketing.

Customizable Feed Rules In-Dash

With GoDataFeed, you can set custom rules for your product feeds directly from the dashboard, allowing you to control and optimize your product listings across different channels.

Real-Time Feed Updates

With GoDataFeed, you can monitor and update your product feeds in real-time from a single dashboard, ensuring up-to-date and consistent information across all channels.

Multi-Channel Feed Synchronization

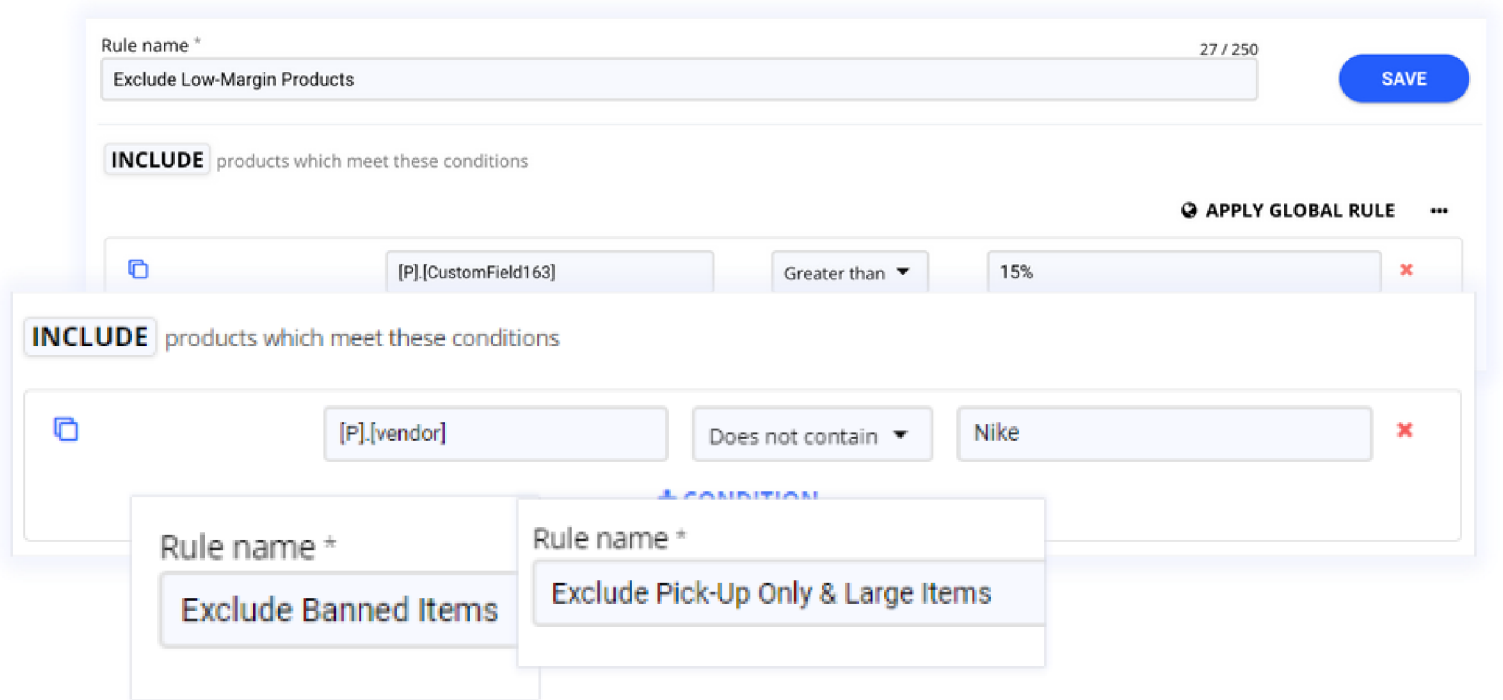

GoDataFeed allows you to synchronize your product feeds across various marketing channels from a single dashboard, saving time and reducing complexity.

Centralized Inventory Management

GoDataFeed enables you to manage your inventory across all ecommerce feeds from a single dashboard, preventing overselling and ensuring accurate stock levels.

Unified Order Syncing

GoDataFeed allows for seamless syncing of marketplace orders back to your shopping cart platform, ensuring your order information is centralized, up-to-date, and easily manageable from a single dashboard.

Continuous Performance Analysis

GoDataFeed uses cutting edge technology and machine learning to analyze product performance, helping you identify underperforming items that may be draining your budget.

Automated Budget Optimization

With GoDataFeed, you can set rules to automatically pause ads for products with low return on ad spend (ROAS), optimizing your budget allocation.

Dynamic Pricing Control

GoDataFeed enables dynamic pricing adjustments, allowing you to optimize pricing for underperforming products to improve their sales potential.

Inventory Management

With GoDataFeed, you can manage channels' inventory levels efficiently, reducing spend on promoting products with low stock levels or slow turnover rates.
